Specifications

06909 SIP 1" Stainless Steel Booster Water Pump 1" with Inlet Filter & NRV Foot Valve

The SIP 1" Stainless Steel Booster Pump is designed for boosting and maintaining pressure. It delivers high performance via a 4500ltr/hr flow rate and durable corrosion-resistant stainless steel pump.

Features:

230v (13A) input supply; 1kW (1.3hp) motor

High 4500ltr/hr/hr flow rate for high performance

Designed for boosting and maintaining water pressure

Heavy-duty corrosion-resistant stainless steel pump

For fixed installation from mains water supply or ponds,

And for external water supplies for garden and agricultural tasks

Water pressure is maintained via a fitted pressure switch controlled between 20psi (1.4bar) and 40psi

(2.8bar)

Inlet filter (PW11-00600) and foot valve (PW11-00601) Booster Pump accessories available as optional extras
