Price: £19.93 (exc VAT) | £23.92 (inc VAT)

Specifications

ARCVG1 Vortex Map-X Brazing Gas Cylinder

The Arctic Hayes ARCVG1 Vortex Map-X Brazing Gas Cylinder is a high-performance solution for all your soldering and brazing needs.

This gas cylinder is designed to burn at higher temperatures than traditional propane and butane gases, providing you with the power and precision required for professional-grade work.

Whether you're a trade professional or a DIY enthusiast, the ARCVG1 Vortex Map-X is ready to meet your needs.

It's suitable for use with most CGA600 threaded torches, offering versatility and compatibility with a wide range of equipment.

This gas cylinder is a testament to Arctic Hayes' commitment to quality, reliability, and service.

It's designed to deliver consistent performance, ensuring that you can complete your tasks efficiently

and effectively.

With the Arctic Hayes ARCVG1 Vortex Map-X Brazing Gas Cylinder, you can trust in the power of your tools and focus on the task at hand.

Purchase today and experience the difference that quality makes.
