Specifications

Sealey BT2020 Vehicle Finder & Battery Monitor

This is an ideal solution providing you with a low cost vehicle tracker as well as a useful Battery diagnostic tool.

Features:

Easy 2 wire connection to battery electrical connections.

Displays real time battery power, voltage and temperature (Smartphone required to download the App).

Wireless connection with dedicated app which supports up to four devices (IOS & Android compatible)

Guides user back to the vehicle by automatically recording the last parking location and showing this on the App -

This function might also aid recovery of the vehicle in case of loss, if the module remains undetected.

Records the route, cost and driving habits of each trip, which can be exported as Excel data.

Automatically monitors the starting and charging system of the vehicle.

Compatible with most 6-12v batteries including lead sealed, AGM and Gel.

Supports up to four devices.

Store historical data in the device for up to 30 days - can be downloaded in Excel format.

Compact device - can be also used on ATV, UTV and farm machinery with a suitable battery power supply.

Specifications:

Average Current 1.5mA

Waterproof IP67

Input Voltage 6-20V

Short Circuit Protection - Built In

Voltage Accuracy(9-16V) $\pm 0.03V$

Reverse Connection Protection - Built In

Operating Temperature -20 - 40°C

Physical Dimensions 55x41x12.5mm

Voltage Range: 6-20V
