

S.151398 Water in Fuel Sensor

Part No: S.151398

Price: £31.62 (exc VAT) | £37.94 (inc VAT)

Specifications

S.151398 Water in Fuel Sensor

OEM: RE519696

Introducing the John Deere Water In Fuel Sensor, a trusted solution designed to detect water contamination in fuel.

It ensures the reliability and longevity of your equipment.

Built with cutting-edge technology, this sensor provides real-time water detection, empowering operators to proactively safeguard their equipment from potential fuel-related issues.

Engineered for effortless compatibility with John Deere machinery, this sensor offers a hassle-free integration process, delivering immediate benefits and peace of mind to operators.

By harnessing the power of the Water In Fuel Sensor, you can enhance the resilience of your equipment, preventing potential damage and optimizing performance in challenging operating conditions.
