Specifications

VPM9074 Clamp Bar 44mm (1.75") 1 pr Bar Clamp

The perfect solution for mounting Worklamps and Accessories to Tractor and UTV Cab Roll Frames.

Avoids the need for drilling holes into the Cab Frame which damages the safety performance of the frame.

A great solution for the problem of holding your LED light.

- Main Usage - Works with LED light bar with side mount screws and bolts, can be mounted directly.
- Quality Material - These LED light brackets are made of premium aluminium alloy material, which is sturdy and abrasion resistant, ensuring maximum strength and durability for long lasting usage.
- Multiple Sizes Available - Sold in a pair and we have 1.5", 1.75", 2" clamp to meet your different requirement.
- Please measure your bull bar, grille guard, top racks and make sure the diameter is correct before purchase.
- Adjustable & Easy Installation - This mount bracket clamp can be rotated 360 degree to adjust

height and angle, very easy and straightforward installation, no drilling or welding required.

- Comes with sponge pads to prevent tractor paint damage, economical and practical.
