Price: £8.33 (exc VAT) Save £4.16 (RRP £12.49) | £10.00 (inc VAT)

Specifications

XMS24COBSET Faithfull 5 Piece Quick Change HSS Cobalt Impact Drill Set

This XMS offering, the Faithfull Cobalt Quick-Change Impact Drill Bits feature a revolutionary tip design far superior to any other drill bit in the industry.

Please note, the innovative drill bits have 7 cutting edges and 3 peaks to offer several distinct competitive advantages:

- Super-accurate self-centring - you can make a hole in a round-pipe with one hand.
- Speed - twice as fast as split point drill bits.
- Tool lifetime - up to 10 times longer life in mild steel.

Manufactured from M35 HSSE grade steel with a 5% cobalt content for increased heat resistance and

up to 10% longer working life.

The cutting performance is fantastic, both on precision and degree of finish, leaving much less defects (burr) than other drill bits.

Its protruding centre tip acts like a pilot drill, enabling super-accurate positioning and stops the drill from wandering.

These bits are impact rated and have a 1/4in quick-change shank for use in impact drivers.

Produced in accordance to DIN 338 and DIN 3126-E6.3, for high precision tolerances and geometric accuracy.

Ideal for heavy-duty industrial work in alloy steels, carbon steels, cast iron, hardened alloy steels, stainless steels, high-temperature alloys, titanium alloy, high strength steel and carbon fibre composite materials.

The Faithfull 5 Piece HSSE M35 Cobalt Quick-Change Impact Drill Bit Set contains the following sizes: 2, 3, 4, 5 and 6mm.
