Specifications

XMS24SQUARE Faithfull CNC Sliding Bevel & Quick Square Set

The New and Exclusive XMS CNC 7in Sliding Bevel & Quick Square Set, by Faithfull, comes from their Prestige range.

It is suitable for all manner of your woodworking projects.

Each piece is made from aluminium using a computer numerical controlled (CNC) machines for precision.

The black anodised finish provides excellent corrosion protection for longevity, and the laser-engraved markings provide extremely accurate measurements, designed to not wear off over time.

The Faithfull Prestige 7in Quick Roofing Square is a must-have tool for carpenters.

Also known as a layout or angle square, rafter square, or speed square, it's designed to provide a quick and precise way of marking out various building projects, especially when constructing roof rafters.

The roofing square combines the functions of a combination, try and framing square and can be used

for basic measurements or as a saw guide for 45° and 90° cuts.

Additionally, it can be utilized as a protractor for measuring angles and pitches.

This makes cutting wall shoulders (bird beaks) or rafter ends quick and easy.

The square also has pre-etched points for easy marking on common-size timbers.

Also included is the Faithfull Prestige 7in Sliding Bevel, it's perfect for laying out and transferring angles during jobs in which the ideal 90° angles are not possible.

Faithfull 'Prestige' products are made to the highest standards and come with a 10-year guarantee.
