Specifications

XMS24WPUMPS Faithfull Waterpump Plier Twin Pack 250 & 300mm

The popular XMS Slip Joint Water Pump Pliers Twin Pack, 250 & 300mm (10 & 12in), by Faithfull.

They are suitable for gripping pipes, nuts, bolts and irregularly shaped objects.

The offset jaws are angled to ensure a positive action and apply extra power when leverage and grip are applied.

The sliding pivot 'slip-joint' on the lower jaw enables rapid adjustment to seven pre-set positions.

They give the advantage of a wide range of jaw openings up to 60mm, without the distance in the handle growing wider making them difficult to grip.

The long handle design provides increased leverage for a positive grip.

Manufactured by Faithfull from chrome vanadium steel with vinyl soft feel coating for user comfort.
